

## A special collection to help educators in the classroom

With feedback from subscribers and the ACS Committee on Chemical Education, a special collection of 101 titles was selected that will help science educators plan their curriculum, setup experiments, construct engaging demonstrations, evaluate performance, and ensure their efforts serve diverse genders, abilities/disabilities, and cultures.

### TEACHING FOCUS

Give your students the edge they need by helping educators access the resources they need. This package of 101 eBooks encompasses educational materials in a variety of relevant topic areas, including the most recent content through 2018.

### ACCESS ANYWHERE

Combine with free ACS2Go for worldwide mobile access.

### ONE-TIME PURCHASE

Priced to be affordable for any institution, acquiring this set of 101 eBooks will guarantee your users access into perpetuity, with **no continuing maintenance or access fees.**

As the number of eBooks available in this subject area continues to grow, users can opt to purchase additional book groupings at substantial savings over list price—or set up a standing order for future books.

Including the latest educational eBooks!
